Literature:

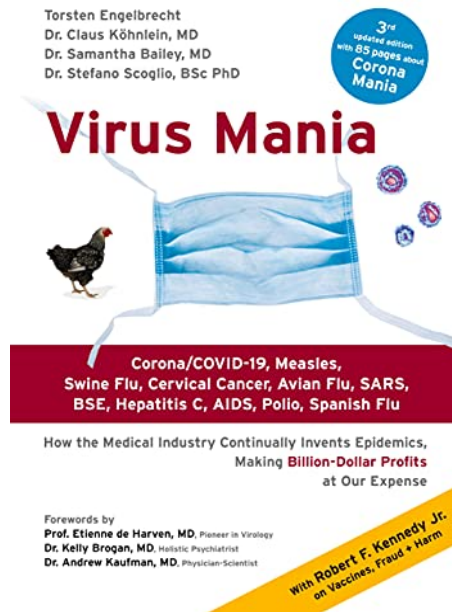

What Really Makes You Ill? Why Everything You Thought You Knew About Disease Is Wrong

This book exposes the medical establishment and all their fraudulent claims. The book meticulously researched by the authors provides a different way of thinking of illness and health.

Virus Mania - 3rd updated edition

Virus Mania exposes the fraudulent virus theory, and provides a different perspective on all the major epidemics & pandemics of the last century, with various toxicological factors as causative agents.

The Truth About Contagion: Exploring Theories of How Disease Spreads

This book is a real eye opener that dares to challenge the consensus view and the so-called “settled science” of infectious viruses and bacteria. Dr. Cowan's book is an excellent introduction, summary, and critique of the germ theory of disease.

Dissolving Illusions

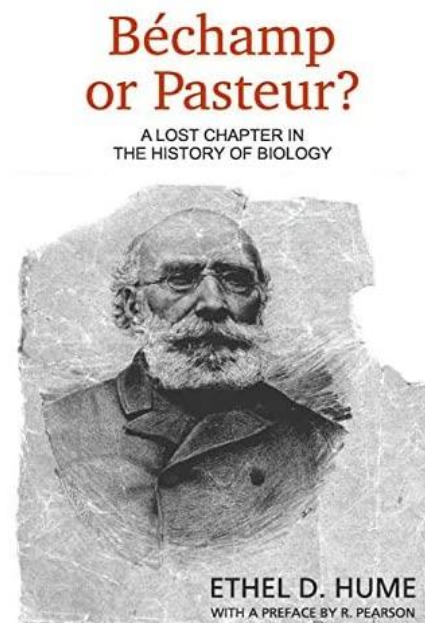

Today, we are told that medical interventions increased our lifespan and single-handedly prevented masses of deaths. But is this really true? Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from “infectious” diseases.

Bechamp or Pasteur?: A Lost Chapter in the History of Biology

This book is a compelling and thorough account of Pasteur's plagiarism and scientific fraud. It contains the evidence of the false grounds on which the germ theory of disease was elevated to its current status as a dogma.

The Private Science of Louis Pasteur

Pasteur passed his laboratory notebooks along to his heirs with the provision that they never made the notebooks public. However, his grandson donated the notebooks to the French national library, which published them. Professor Gerard Geison published an analysis of these notebooks, which revealed that Pasteur had committed massive fraud in all his studies. The Moth in the Iron Lung: A Biography of Polio

The author presents evidence that polio epidemics were unlikely caused by any virus. The evidence over the last 100 years clearly points to the pesticide chemicals such as arsenic,

lead, and DDT that were placed on our food, in our environment, and even directly on children.

The Invisible Rainbow

This book traces the history of electricity and electromagnetic radiation, and describes the health outcomes that accompanied each step toward greater electrification. It makes a compelling case that many diseases of industrialized civilization are related to electrical pollution / EMF.

DDT/Polio: Virology vs Toxicology

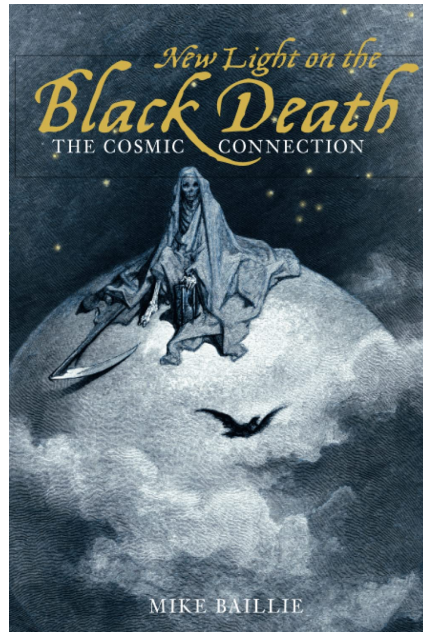

With modern epidemiological graphs, with toxicological and virological insights, the book describes a human disaster resulting from the massive application of persistent pesticides circa 1945-1972, that caused the great polio epidemic.

New Light on the Black Death: The Cosmic Connection

Over the years doubts have been expressed about the accepted view that the Black Death was caused by bubonic plague spread by rats and fleas. By looking at the evidence of eyewitness reports, tree-rings and ice cores, Professor Mike Baillie, a leading expert in dendrochronology (dating by means of tree-rings), has identified a series of natural catastrophes at the time of the Black Death.

Animal Pharm: One man's struggle to discover the truth about Mad Cow Disease and Variant CJD

A farmer turned scientist, Mark Purdey, has found substantial evidence that Mad Cow Disease (BSE) was mainly caused by a government mandated cattle treatment consisting of toxic organophosphate pesticides.
